

Celebrating the **Success** of India's **ESDM Industry**

Highlights of EFY Expo India (EEI) 2015

The two clear objectives

- (1) To promote 'Make in India' and
- (2) Showcase the latest in electronics.

The Theme for 2015

The theme this year, 'Celebrating the Success of the ESDM Industry in India', is radically different. Instead of discussing the opportunities and challenges as is done at almost all other events, this event will showcase Indian success stories of the last few years.

Promoting 'Make in India'

Two seminars* will be held at EEI 2015 to discuss the opportunities in electronics manufacturing in (1) LED lighting and (2) Automotive electronics.

The Innovation Zone

This is a unique part of the show (seen only in select international expos), where you can witness the latest innovations by Indians. Ranging from state-of-the-art drones to wearable devices that monitor your heart—the innovations cover a range of applications and industries. You are bound to get new business ideas after a visit to this zone, and may even end up partnering with some of these innovators.

The Automotive and Electronics Industries Team Up!

With Automechanica (a leading auto-components show) co-located with EEI 2015, you can network with the Who's Who of the automotive industry too.
