

FEEDBACK

Sports Electronics

I am an eighth-grade student who finds Electronics For You interesting and joyful to read. I often refer to my uncle's copy for updating myself about current technology trends. However, most magazines cover articles on technology in the fields of medicine, education and agriculture only, and rarely on sports. I would really like to read a story on the contribution of technology to sports and request EFY team to publish the same in one of the forthcoming issues of EFY.

EFY. It is a brilliant idea! We need to cover the role of electronics in sports too. We will try and publish stories on related topics as soon as possible.

EFY App in Android

First, I would like to thank EFY customer support team. They replied to my query within three days. Second, is there any way I can get past issues of EFY on my Android phone?

Santhosh Samuel

Through e-mail

EFY. You can download the free EFY app from Google Play store to your Android device to access subscribed issues of EFY. As for now, older issues can only be read at our Ezine portal. Please visit <http://ezine.efymag.com/> for the same.

We have also partnered with Magzter Inc. Using Magzter app, subscribers will be able to read subscribed issues on mobile platforms like Android, iOS and Windows 8, as well as PCs. We expect this facility to be rolled-out very soon.

Amateur Radio

I am a huge fan of EFY and have read every copy since the last two years. This is regarding 'Wireless Communication' article published in November

2014 issue. I am an electronics and communication engineer and found it to be very informative. I thoroughly enjoyed reading it.

I am also an amateur radio operator, licensed by government of India (Ministry of Communication) for HAM radio operations in my region. Recently, I discovered that there are many HAM radio operators in Bengaluru, but first-time users do not get proper guidance on how to use the equipment or how to set up their own HAM stations.

Please publish an article on amateur radio in the forthcoming issues of EFY as it will benefit the new generation of HAM operators. The article could include guidance techniques starting from how to obtain a HAM licence to how to set up your own station. It will be great if we have more HAM operators in the country as the scope for communication will increase and enthusiasts all over the country will find a new hobby.

Efforts EFY puts into research and compilation for any article are highly commendable, and I do not think anyone is better equipped than EFY to guide the next generation of HAM operators properly.

Shrinidhi G.

Bengaluru

EFY. Thank you for the feedback and suggestion! Please note that we have ABC of Amateur Radio and Citizen Band book available with our associates Kits'n'Spares. You may contact them on 011-26371661 or visit www.kitsnspares.com for details.

EFY DVD

In the DVD section of December 2014 issue, Opera version is wrongly printed as 24.0.1558.66. When I installed it, the version was found to be 26.0.1656.32.

I need one mini project. Please help.

Mounendar Chintu

EFY. You may visit www.kitsnspares.com for the project.

☐ I need a simple automatic LED emergency light circuit.

Khadija Choudhary

EFY. You may refer to 'Desktop LED Emergency Light' circuit published in September 2014 issue.

'Spot An Error' Award Winners

In 'Crystal-Controlled AM Transmitter' circuit published in October 2014 issue, an antenna is used in the circuit, but it is not mentioned in Parts List.

Siddharth Kaul

Errata

In 'LED Scrolling Display' DIY project published in November 2014 issue, on page 75, in the second column, "resistors R1 and R5" should be read as "rows R1 and R5." On page 77, in the first column, "The eight npn Darlington connected transistors (T1-T8)..." should be read as "The in-built eight npn Darlington connected transistors in ULN2803..."

EFY. The file version for Opera web browser included in EFY DVD for December 2014 is 24.0.1558.66. Since the new version (26.0.1656.32) is now available, it automatically updates itself to this version during installation.

Power Amplifier for FM Transmitter

In 'Power Amplifier For FM Transmitter' DIY article published in November 2014 issue, in the first paragraph, "Use of a good ground plane will further increase the range..." should be read as "Use of a good ground-plane antenna will further increase the range..."
