Vavia Technologies unveils FreePaisha, a free mobile recharge Android app

FreePaisha guarantees unlimited rewards (in the form of free recharges) to each subscriber as a bonus for downloading all apps listed within FreePaisha app. With FreePaisha, users get instant, free talk-time in minutes. It is the first app in India that pays users for using other apps. It also pays users for referring friends to use the app. This way the right apps are targeted at users and they are incentivised to try these apps. FreePaisha facilitates free, instant mobile recharge across all major operators in India. Post-paid customers can use wallet money for paying their mobile bills.

QuikWallet—India's first true mobile wallet

LivQuik, a start-up, has launched QuikWallet, an innovative payments service that enables secure hassle-free transactions. At a restaurant, to make a payment using this app, you can share a mobile number or name with the staff member serving your table. The bill is delivered to the number of the concerned person. This operation is completed by entering a CVV number and the bank's password.

Nimbuzz introduces Holaa! Caller ID app for Android

The instant messaging platform, Nimbuzz, has launched a caller ID app called Holaa! The Made in India app is similar to Truecaller app as it allows users to see caller details like name, location and photo (if available). It also allows blocking spammers or unwanted callers. Holaa! has been released in English, French, Spanish, Arabic, Persian and Portuguese languages for Android devices.

ASUS Launches Strix Pro Headphones

Headphones that work on instinct

Strix Pro is powered by 60mm S neodymium magnet drivers, which give users (gamers) the most accurate sound fidelity. It weighs only 320gm. The control box is USB-powered and includes a built-in microphone that actively detects and counters environmental noises, such as mechanical keyboard tapping and speech. Its environmental noise cancellation (ENC) technology intelligently filters out over 90 per cent noise.

Strix Pro is compatible with most popular devices. The control box comes with 1.5m extension lead with separate headphone and mic plugs, for compatibility with PC and Mac. It even works with smartphones, tablets and PlayStation 4, owing to the four-pole 3.5mm audio-mic combined adapter.

Strix Pro is extremely portable and comfortable to wear. Its foldable design allows ear cups to lie

Price: ₹ 5999

flat, making the device ideal for packing and carrying around. The detachable microphone can be easily removed too.

Named after the ancient Roman and Greek word for owl, Strix means the keenest hearing and sharpest eyesight. It means feeling your environment so that you detect and react to the slightest movement, and surviving on the edge of instinct.

Vivo Unveils X5Max In India

The world's slimmest smartphone

Vivo X5Max is only 4.8mm (0.19-inch) thick. It weighs 146gm and sports 12.7cm (5-inch) 1080x1920 pixels super AMOLED display. It is powered by Qualcomm Snapdragon octa-core 64-bit processor, with 2GB RAM. The phone has an internal memory of 16GB.
