Kindle Cloud Reader Now Available In India

Amazon's Kindle Cloud Reader, a free Kindle reading app, that enables customers to read Kindle books instantly, with only their web browser, is now available to customers in India. Kindle Cloud Reader enables you to read your books online or offline, with no download or installation required. As with all Kindle apps, Kindle Cloud Reader automatically synchronises your Kindle library, as well as your last page read, bookmarks, notes, and highlights for all of your Kindle books, no matter how you choose to read them.

Nokia Brings Z Launcher To Android Devices

Nokia has just introduced Z Launcher, currently in its pre-beta phase, which aims to make it easier for Android users to navigate around their devices. According to a blog post by Nokia, "As soon as you install and start using Z Launcher, it starts learning what you use throughout the day and automatically surfaces whatever you're most likely to need at the right moment." There is a Scribble feature in the Z launcher, which allows users to draw the first letter of whatever they are looking for on their phone's apps or contacts. The launcher will show the results accordingly. In addition, users can add extra letters to further refine the results.

Apple iOS 8 Will Let You Find Your Parked Car

Apple's new iOS 8 operating system will reportedly let you find your car using your smartphone. The new OS, which was introduced at Apple's Worldwide Developer Conference recently, will add the feature to iOS-based devices like the iPhone and iPad. It is worth noting that Apple's competitor Google had added the feature to its Google Now smart assistant a month ago.

Intex Launches Low-Cost Quad-Core Phone

One of the cheapest quad-core smartphones in market

Home grown manufacturer, Intex, has launched its budget offering in the quad-core segment with new Aqua i5 Mini smartphone. The Intex Aqua i5 Mini smartphone features an 11.4cm (4.5-inch) FWVGA IPS display with a 480x854 pixel resolution.

Xolo Launches First Windows Tablet

The tablet PC is powered by an AMD Temash A4-1200 processor

Xolo has become the first Indian manufacturer to launch a Windows-powered tablet in the Indian market. Dubbed the Xolo Win, the tablet is available on Flipkart along with an exchange offer where users can get a minimum of ₹ 3000 off on the device. The offer allows users to trade in their old smartphone, tablet or laptop for the Xolo Win device.

The tablet has a 25.7cm (10.1-inch) display with 1366x768 pixel resolution. It has dimensions of 266x167.8x12 mm and weighs 750 grams. In addition, the device is powered by an AMD Temash A4-1200 processor along with the Radeon HD 8180 graphics chip. It has 2GB RAM and 32GB internal memory. It runs on a 3550mAh Li-Ion battery, which gives it six hours of battery life.

The tablet PC device comes preloaded with Microsoft Office suite and has 2-megapixel rear camera and 1-megapixel HD front camera. Besides, the Windows 8.1 operating system is available in the tablet, which also has Wi-Fi, micro-HDMI and micro-USB capabilities. The device does not support 3G connectivity though.
