

Live Telecasting on Your Web

I saw 'Live Telecasting on Your Web' DIY article published in May issue. This is an informative and interesting project. My son has done this project and successfully telecast a birthday party on the Internet. I thank you for publishing this type of do-it-yourself article!

EFY: Thanks for the feedback!

Article for EFY

I want to write an article for EFY on Digital Image Processing with topics ranging from basic imaging algorithms like Sepia, Grayscale, Negative, etc to a bit advanced image processing like kernel filters and fractals. The language can be either Java or Python, as per your choice.

EFY: Please see the guidelines for contributing articles at http://efymag.com/Guidelines_for_EFY_authors.doc and email your articles to editsec@efy.in

Remote Control Tester

The 'Remote Control Tester' circuit published in May is interesting. But easier method is to use a digital camera or camcorder. Point the remote towards the camera and press any button. You will be able to see IR LED flashing on camera screen.

PCB Design Software

I need PCB design software that does not require Internet connection during installation. Please help.

J.C. Adhyaru

EFY: You may refer to DIP Trace, FreePCB and Layout Editor software included in the DVDs provided with EFY Plus February and April issues. To buy the back issues contact EFY associates Kits'n'Spares on info@kitsnspares.com

FM News Channel Using Raspberry Pi

I liked 'Personal FM News Channel Using Raspberry Pi & RSS' DIY article published in November 2013 issue. Where can I buy one Raspberry Pi board and accessories for making this project?

Karthik Hegde
Through e-mail

EFY: You can purchase Raspberry Pi board from Kits'n'Spares. For details, you may visit their website at <http://kitsnspares.com/user1/buyproduct.asp?id=79>

Making FM Transmitter

I am a student interested in making an FM transmitter circuit. Please give me related circuits.

Ram

□ I want short-range as well as long-range FM transmitter circuit diagrams. Please help.

Bikram
Nepal

EFY: You may refer to 'Wireless FM Microphone' circuit published in January issue under Circuit Ideas section. This circuit is nothing but a simple FM transmitter with loud-speaker used as a microphone. You may also refer to long-range FM transmitter circuit from http://electronicsforu.com/new-electronics/lab/search_lab.asp?words=transmitter

High-Speed DWDM Technology

In 'High-Speed DWDM Technology' article published in May issue, under

'Spot An Error' Award Winner

In the e-Style First Look section published in June issue, specifications of the Intex Aqua 15 HD is wrongly mentioned as 1GB of RAW instead of 1GB of RAM.

Errata

1. In the component layouts for the PCBs of 'Real Time Clock with Temperature Logger' and 'Safety Timer for Home Appliances' circuits published in March issue, the 0.1u value printed between IC3 7805 and LED1, respectively, is not required.

2. In the 'Wi-Fi Embedded Webcam' circuit published in September 2013 issue, under Software section, in second paragraph, EFY EVD should be read as EFY DVD.

3. In the 'Humidity Indicator and Controller' circuit published in February issue, switch S1 should be read as 'on/off switch' instead of 'On/off switch' in component layout for the PCB.

□ In the 'Temperature-Sensing Diodes Selector' circuit published in January issue, the IC1 (7818) and IC2 (7809) should have been included in the parts list.

Akanagamamma S.M.

Multiplexing techniques sub heading, in second paragraph, TDMA is wrongly mentioned as Time Division Multiplex Access instead of Time Division Multiple Access. Again, in fourth paragraph, FDMA is mentioned as Frequency Division Multiplex Access instead of Frequency Division Multiple Access.
