

Toshiba, a world leader in semiconductor technology, offers an extensive line of MCU for **MOTOR CONTROL** Application.

Product lineup is arranged according to the Motor Controlling Method and Application

ROADMAP

STARTER KITS

Starter Kit for TMPM370

Contents

Evaluation Board for TMPM370
J-LINK for TOSHIBA (or i-jet Lite)

Starter Kit for TMPM370

Contents

Evaluation Board for TMPM375
loaded inverter circuit
i-jet Lite
DC Motor

The TMPM370FY is ideal for motion control in home appliances and industrial applications where it reduces the need for additional components while providing significant benefits over software-based vector control running on a microcontroller.

Starter Kits also available from NGX Technologies Pvt. Ltd. Email: sales@ngxtechnologies.com
