

Cutting Edge Advanced Ceramic Products for Electronic Applications

- CeramCool® heat-sinks for thermal management of high-power electronics and LED applications
- CeramCore for metal-oxide, carbon-film, metal-layered, thin-film and wire-wound resistors
- Circuit Carriers metalized optimally suited for directly mounting electronic components
- CeramGlass with thermal properties similar to those of glass for circuit breaker and sensory technology
- Metalized Ceramic Coil Bodies for Electrical Inductors
- CeramCell for Solid Oxide Fuel Cell Systems (SOFCs) comprising (ESC) and (ASC) cells
