

Emulator (J-Link™)

ARM/Cortex™ and Renesas RX

8.16.28 J-Link Ultra+ includes all software licenses, **NEW: 3 MByte/s** download speed, the fastest J-Link debug emulator yet

3 MByte/s Download

- Fastest JTAG Emulator Available
- Extremely Fast Flash Download
- Intelligence Inside the Emulator for Robust Communication
- Multicore Debugging Support

- Supports All Popular IDEs Including CodeBench, CodeWarrior, Crossworks, emIDE, EWARM, HEW, MDK, TrueStudio and GDB/RTI Compliant Environments

The J-Link Ultra+ and J-Link Pro include a number of software modules to fit your application needs.

J-Flash is a standalone application used with the J-Link to program internal and external flash devices.

J-Link Unlimited Flash Breakpoints permits you to set an unlimited number of breakpoints while debugging in internal and external flash memory.

As the original manufacturer of the J-Link and its OEM derivatives, we are happy to inform you that this software also supports the Analog® mIDAS-Link, Atmel® SAM-ICE, and IAR® J-Link.

Programmer (Flasher)

Stand-Alone Programmer

5.07.01 Flasher ARM Ethernet, RS232, and USB interface

- Fast Flash Download
- Flexible Interface for Easy Integration into Production Environments

ECX team is most experienced in the industry in navigating the complex electronic components manufacturer distribution channel. Our Team have the knowledge, tools and reach to provide solutions for even the most demanding supply chain sourcing needs. Whether the goal is to limit line-down situations by sourcing, decommits or to improve margins by buying opportunistically, you can trust ECX.
