

Unbeatable Prices Portable RF Signal Generator

The GW Instek USB series RF signal generator is a pocket-sized and USB interface compatible RF signal generator. It covers the frequency range from 35MHz to 4400MHz. The USB series provides continuous wave (CW) signal outputs without any signal modulation function. The built-in electronic attenuator of the USB series allows an adjustable power range between -30dBm to 0dBm. The USB series has several operational modes including fixed frequency, frequency sweep, frequency hopping, and power sweep. A USB CD-ROM provides dedicated PC application programs, which were developed under JAVA software structure. This USB PC application program supports operating systems such as Windows 2000/XP/Vista/7/8, Linux & Mac OS X through the USB interface. Users can download USB APP to smart phone or tablet with Android 4.0 or above. To operate USB, use USB-OTG connecting cable to connect tablet (or smart phone) and USB. The Android APP application software for the USB signal generator is available on Google Play Store. The USB signal generator can be designated as the tracking generator for GSP-730 spectrum analyzer to conduct measurement functions of scalar network analyzer. A USB CD-ROM provides PC application programs for the GSP-730 Primary RF software. Users can, using a Windows OS computer, control USB and GSP-730 via the Primary RF software.

USB-Series RF Signal Generator

- Frequency Range : 34.5MHz ~ 4400MHz
- Output Power Range : -30dBm ~ 0 dBm
- Continuous Wave Signal Without Any Modulation
- Support Fixed Frequency, Frequency Sweep, Frequency Hopping & Power Sweep Mode
- -107dBc/Hz Phase Noise@100kHz Offset
- Frequency Resolution : 10kHz
- PC USB Interface Powered and Controlled
- External PC Software Support Different Operating System

Test Result of Low Pass Filter with Primary RF Software

The USB signal generator can be designated as the tracking generator for GSP-730 Spectrum Analyzer to conduct measurement functions of scalar network analyzer. Users can, using a Windows OS computer, control USB and GSP-730 via the Primary RF software.
