

Innovation in Lighting

Intelligent Lighting and Control Solutions from Microchip

Old fashioned incandescent lighting is rapidly vanishing, and being replaced by super-efficient LED light sources. Along with energy savings, LEDs bring opportunities for lighting manufacturers to differentiate their products in ways never before possible. Color mixing, daylight harvesting, predictive maintenance, energy management and remote communication and control—today's advanced concepts will be tomorrow's standard features.

Microchip Technology has solutions for connectivity, power conversion, sensing, control, user interface and more, giving you the freedom to focus on innovation.

Make your next lighting design different with Microchip.
