

Troubleshooting and Repairing Tips

Do-it-Yourself (DIY) troubleshooting and repairing of electronics gadgets can be fun as it helps you save money and gain useful knowledge. This month we present some websites for the brave hearts who like to troubleshoot and repair electronic devices by themselves

NIRAJ SAHAY

fixya.com

Fixya is a community-based troubleshooting resource that provides consumer-generated, practical tips to help consumers solve problems concerning over 12 million products. Fixya is a place where individuals can share real-world experiences and connect to provide each other practical advice. Today, FixYa continues to empower individuals to repair and improve upon their already-purchased possessions. From fixing cars to cameras and iPhones, FixYans are part of a DIY revolution that helps empower techies, tinkerers and hobbyists across the globe.

ifixit.com

iFixit is a global community of people helping each other repair things. It was started in 2003 by Luke and Kyle in a dorm room at Cal Poly, San Luis Obispo. It helps thousands of people repair their devices every day. Initially started for Apple products, the website now provides free repair manuals and troubleshooting guides for other products too.

repairfaq.org

Sci.Electronics.Repair frequently asked questions (FAQs) feature Samuel M. Goldwasser's latest and greatest notes on troubleshooting and repairing. The site is text based and there are no unnecessary, superfluous or useless graphics of any kind. The site covers troubleshooting and repair of consumer electronics equipment.

<http://www.ifitjams.com/>

ifitjams.com

When the problem you are trying to fix is not so obvious, it can help to have a flowchart that logically takes you through the process of elimination. The website has details of troubleshooting laptops, PCs and cars based on flowcharts. The site was started by Morris Rosenthal and is a wonderful resource for people who like troubleshooting.

diy-computer-repair.com

The website helps you discover how to troubleshoot, repair, upgrade and maintain your computer. The purpose of this DIY computer-repair website is to assist you with all the information that you may need to troubleshoot and repair your faulty desktop, laptop or server. The site also hosts blogs to share your experiences on fixing problems.
