09400145111. Web: www.medielectronics.com

MEDI's transformer-less solar pump control with MPPT and VFD algorithm. *Suitable for standard 415V 3-Phase 0.25HP to 5HP pumps *Panel input voltage range - 90V to 850V *AC output voltage: 0 to 480V phase to phase, 0 to 65Hz. *Protections against dry-run, overload, short circuit and high volt.

- MPPT VF drive will give maximum torque even at minimum sunlight
- The system runs at maximum efficiency at all the time by constantly maintaining the motor in the right slip.
- IGBT module directly mounted on heat sink
- **Wireless Zig bee connectivity to the PC / Data logger.** Internet uploading and online monitoring of panel voltage, current, power, energy produced

Technical know-how transfer cost - Rs. 10 lacs

Cost of MEDI's control module - Rs.5500
(fixed for entire range up to 5HP)

BOM of a 5HP unit including control module is less than Rs.15000.

COMPLETE SOLUTION FOR SMPS/LED DRIVER TESTING

SPEA-1

For AC & THD measurement

Electrical Parameters

(Volt, Current, Watt, PF, Hz, Wh)

Mode:RMS, AVG, PEAK, CF, FF

Harmonic : Upto 55th harmonic

Voltage & Current THD

Harmonics in value and percent

Pass/Fail facility

SD Card storage

EMBUILT TECHNOLOGIES
C-15, Sarvodaya Nagar, Kanpur, Uttar Pradesh (INDIA)-208005
Website: <http://www.embuilt.com>
E-mail: info@embuilt.com
Tel: 0512-2220895 Mob: +91-7524853539

SMART-QC

For AC & DC measurements

AC Parameters

(AC Volt, AC current, AC watt, PF, Hz)

DC Parameters

(DC Volt, DC current, DC watt, efficiency)

Software compatible

SOFTWARE

PDF Report generation

All parameters AC/DC/THD

are saved in one excel report

Data logger

Online Graphing

Real time view
