

EMBEDDED SYSTEM & ELECTRONICS DESIGN SERVICES

Highest Quality & Most Economical Supplemented By Wide Spread Domain Knowledge

ISO 9001 Company, With 50 Man years of Professional Experience.

Recently Completed Projects

All The Completed Projects Are With 100% Customer Satisfaction

- **Hardware Monitoring System** : AVR 32 bit controller, AT 32U 3A 1256, A Defence Project, Completed remotely, Ethernet Stack, 12 nos of analogue input, Free RTOS Porting
- **Digital Engraving Machine Controller**: based on dsPic, Completed in 15 Man Months, including proprietary "Font Creation Tool"
- **Elevator Controller**: ARM7 based 32 storey, 2 Lift auto synchronisation controller, with ModBus Communication
- **AMF Controller**: for Gensets with full power measurement, 27 input parameters & GSM modem for communication through SMS (for Warning & Trips) in 20 Man-Months.
- **Automobile**: "Proof of Concept" for Autodrain Mechanisms for Diesel filter in commercial vehicles Completed in 2 Weeks.
- **WE HAVE OFFERED PRODUCTION SUPPORT TO ALL CUSTOMER**

New Activities Launched

- RTOS Porting on all families of Controllers in various IDE.
- Raspberry Pie Applications
- Robotics

Services Offered

- Product Specification Finalisation
- Hardware Software Co-Design
- PCB Design and Population
- C/C++ Code
- Prototype Making
- Design Verification
- Manufacturing Support
- Maintenance Of Existing Embedded System Design—Software as well Hardware

A Well Documented procedure for perfection, with Minimum Interaction Time & Resources
