

HTC One M8 Launched in India

Runs on 2.3GHz Snapdragon 801 processor

HTC One M8 has finally made its way to the Indian market. The smartphone is yet another attempt from HTC's end to make its mark in the Samsung-dominated Indian market. The phone is equipped with a 12.7cm (5-inch) full HD display and runs on a 2.3GHz Snapdragon 801 processor.

The smartphone offers support for 4G LTE and is powered by Android 4.4.2.

The Taiwanese smartphone maker has also launched the Sense 6.0 interface along with Motion Launch in this smartphone. The Sense 6.0 feature will allow the users to interact with the phone without turning on the display screen.

Other features include 2GB RAM, 32GB internal memory, micro-SD card, Duo Camera with 4.1 UltraPixel + 2MP depth, 5MP front camera and 2600mAh battery (talk time 21 hours and standby time 21 days). The phone connects with 3.5mm stereo audio jack, Bluetooth 4.0, DLNA, Wi-Fi (802.11 a/b/g/n/ac) and NFC. The size of the device is 146.3 × 70.6 × 9.35mm and weight is 160gm.

LG Introduces World's First Curved OLED TV

Offers most comfortable and immersive viewing with a shape inspired by nature

LG has launched a world-class LOLED TV, model 55EA9800, in India. Its screen has been curved to normally fit our vision range and is the most optimal form for any display, providing equal distance from all parts of the screen to the eyes. The degree of curvature is based on careful and scientific calculations. The resulting screen allows no distortion of objects. Shaped after the natural form of human sight and vision, the screen is more comfortable and the images more real.

Other features include four colour pixels, infinite contrast, absolute motion clarity, 140cm (55-inch) screen size and 1920 × 1080p resolution. The TV has a THX-certified display, dual-core processor, resolution

upscaler, Picture Wizard, 40W audio output, Dolby digital decoder and Clear Voice II. It is Skype Ready with built-in Wi-Fi, USB playback and HDMI/HDCP.

Xerox Unleashes Wide-Format IJP 2000 and Xerox 570 Digital Printers

Offer high-speed wide-format prints and true multitasking

Xerox Corporation has introduced wide-format IJP 2000 and Xerox 570 printers to meet the growing demand for large indoor posters, signages, point-of-purchase graphics and banners. The IJP 2000 breaks the mould in terms of speed. Increased speed means printers can accept and produce more wide-format jobs, even last-minute requests.

Other highlights of IJP 2000 printer are stationary print heads, high vibrancy with instantly dry ink, expansive specialty media range and wide-format workflow software.

Some key highlights of Xerox 570 include true multitasking and Xerox ConnectKey for SharePoint, Scan to PC Desktop and Mobile Print features.
