

stallation, launch PixelView from your desktop. The screenshot of the program output is as shown in Fig. 6. Select TV option from PixelView control panel, configure the video as PAL system and country as India. Now connect an antenna or a cable TV to the card to watch TV programme on your PC. If your TV programme is working well, it is time to test the camera.

Test the picture and sound of your camera with the TV tuner card by connecting camera audio and video outputs to audio and video inputs of the TV tuner card. You can use a self-made 50m long CCTV cable with male and

female connectors on both ends of the cable for audio and video connections (refer Fig. 8).

Select Composite option from PixelView's control panel and switch on the Sony Handycam. You will get a picture on your PC monitor screen and sound on your speakers.

You can also connect another similar device with audio and video
