HTC, Google to Release the Nexus Tablet

Google and HTC are working together to introduce a new Nexus 8 tablet which would be launched in the third quarter of this year. Ironically, earlier HTC had announced to shelve the tablet plans to focus on the smartphone business.

Moto G CDMA Now Available in India

Reliance Communications is now offering the CDMA version of Motorola Moto G 8GB model for ₹ 13,490. It is offering only the black variant of the handset. You can also opt for 6 months or 12 months EMI scheme under which you have to pay ₹ 2334 or ₹ 1205 per month, respectively.

Microsoft, HP, Pearson to Launch Tablet for College-Goers

Microsoft has partnered with HP and Pearson to launch a tablet for students pursuing higher education in the engineering and management streams. The companies will jointly launch the Windows 8.1 powered 26cm (10.1-inch) Hewlett-Packard (HP) Omni10 tablet with embedded content from Pearson and Microsoft office in the higher education space. Priced at ₹ 29,999, this is the software giant's second offering.

Uiee Launches World's Smallest All-in-One Charger

Uiee has recently launched the world's smallest charger with a retractable cable (available for micro-USB or Apple's lightning connector). There are also fold-out prongs for plugging it into a wall socket and a clip at the back for clipping it to belts, pockets or bag straps. It is also one of the first chargers to become wearable.

Agent 18 Introduces Fresh Line of Samsung Galaxy S5 Cases

Coinciding with one of the most anticipated phone releases of the year, the Samsung Galaxy S5, Agent18 is launching a fresh line of fashion-centric and protective cases to safeguard the new smartphone.

Asus Launches Fonepad 7 Dual-SIM Tablet

Offers 18cm (7-inch) display with multi-touch feature

Asus has launched a refreshed version of its popular Fonepad 7 tablet in a dual-SIM avatar dubbed Fonepad 7 for the Indian market. The Taiwanese tablet maker clearly seems determined to get some market share in India. This dual-SIM tablet comes with an 18cm (7-inch) display with multi-touch feature. It runs on Android OS, 4.2 Jellybean and can be upgraded to v4.3. It is powered by a 1.6GHz dual-core processor.

The new tablet from Asus has an ex-

pandable memory of up to 32GB. It has 8GB of in-built storage, while

Asus is also offering 16GB Asus WebStorage cloud storage for one year. It is supported by a 5MP primary camera with geo-tagging feature along with a secondary camera. It has a battery capacity of 3950mAh to provide a lasting battery life. The tablet is now available only on Snapdeal.com.

Sony Launches Xperia M2 Dual

Powered by quad-core 1.2GHz Qualcomm Snapdragon 400 mobile chipset

Sony has introduced a new powerful mid-range smartphone, Xperia M2 Dual, flaunting premium looks. Tailored with the OmniBalance design, the Xperia M2 Dual features a 12cm (4.8-inch) LCD display with 960x540-pixel resolution. This display is not that great for a mid-range device as most of its competitors come with high-definition (720p) native resolution.

There are two versions of Xperia M2—one version sports the 1.2GHz Qualcomm Snapdragon 400 MSM8226 quad-core processor while the other has the LTE capable Snapdragon 400

MSM8926 processor.

Since Sony has announced the Xperia M2 Dual with 3G connectivity for India, it is quite clear that it will come with the Snapdragon 400 MSM8226 chipset. Both the versions though have 1GB RAM and the Android 4.3 Jelly Bean update running on top of it.

The phone has an 8MP camera with Exmor RS image sensor. Besides, it features a 2300mAh battery and is offered in purple, white and black colours.

The Xperia M2 will have to compete with some really interesting set of devices, namely, Samsung Galaxy Grand 2, HTC Desire 700 Dual SIM and Motorola Moto G.
