

India invites persons of Indian origin to invest

The electronics sector in the country is going through a challenging period, with rising imports depleting India's foreign exchange reserves. The government is said to be reaching out to distinguished persons of Indian origin

Workers in an electronics manufacturing unit

(PIOs) to form a global advisory board that will help in the development of the electronics sector in India.

The Department of Electronics and Information Technology is reported to be approaching PIOs who will help restructure the market using their knowledge, experience and expertise. The idea is to build a self-sufficient economy wherein exports exceed imports.

Cheaper finance can provide boost to the solar sector: Report

Availability of cheaper funds can help the solar sector in the country to grow, stated a latest report. The report also emphasised on liberalised external commercial borrowing norms, amongst other measures, to help boost India's solar energy sector.

The report was prepared by Hindustan Power in association with PHD Chamber of Commerce. It stated that increased solar general capacity can be helpful in reducing the dependence on power from coal plants. The report on solar energy sector highlights measures that can help in providing the desired boost to the sector in the coun-

Emerson Network Power bags 'Best Innovation Award'

Emerson Network Power received the Best Innovation Award at ACREX 2014 held in New Delhi. The company displayed its Liebert PCW and Liebert PEX DS in the data centre cooling category, and its SmartCabinet—an integrated, intelligent data centre infrastructure offering—at ACREX 2014.

try including availability of cheaper finance.

Soon a separate solar policy for PSUs

The Ministry of New and Renewable Energy is planning to develop

a separate policy for PSUs to set up solar and wind energy power projects across India. The country needs massive reforms to stably build a renewable energy platform and also provide help to public sector undertakings (PSUs) in implementing them. The increasing interest of PSUs to set up renewable energy power plants has encouraged the ministry to develop specific schemes and policies, in collaboration with the Solar Energy Corporation of India. Many PSUs, such as ONGC, BHEL and NTPC, have made proposals for the installation of wind and solar energy projects.
