EFY: We are very happy that our gift reached you, and you found it worthy. Thanks for sharing your feedback with us! We truly appreciate it.

Leased Line Networks

I am a regular reader of EFY and interested in telecom-related topics. I found a very attractive and informative article in March issue of EFY. The article 'Managed Leased Line Networks' written by Dr Rajiv Kumar Singh is very well presented and very informative. I really appreciate author's contribution and editor's efforts in publishing this article in EFY. A lot of my doubts have been cleared after reading this article. My sincere thanks to the author and EFY team! Keep it up!!

EFY: We are glad to hear that you found the article informative. Thanks for your feedback and appreciation!

EFY Club

I like the 'Electronic Design Verification and Validation: Excellent Opportunities' article under Career section in February issue. I am a student and avid

reader of EFY. I even invited many of my friends to my EFY Club in my hostel and convinced them to subscribe to EFY. I had tried more than 50 projects within a year of my EFY's subscription. Please send some more interesting projects that can help develop my knowledge in the field of electronics.

EFY: First of all, thanks for your interest in EFY! We are glad to hear such a good response from you and we wish you all the very best for your EFY Club! You may visit www.kitsnspares.com website to get more details on practical projects, tool kits and books.

Home Appliance Control via Bluetooth

I have come across a topic on 'Home Appliance Control via Bluetooth' in Q&A section in one of the EFY issues. From where can I get the complete source code, circuit diagram and PCB design for that project?

Ashru Jadhao
Through e-mail

EFY: We do not have the code and PCB of the circuit covered in Q&A section. Please note that the circuit was given along with our reply to a query raised by a reader, only to give him a brief idea on the topic using a simple interfacing circuitry. If you are interested in a practical circuit, you may refer to the 'Android-Powered Access Control via Bluetooth' and 'Home Automation Through Bluetooth' projects

'Spot An Error' Award Winners

❑ In 'Resistor Value Calculation Standalone Application with MATLAB' article published in April issue, the calculated value of resistor is mentioned as $27k\Omega \pm 5\%$ instead of $270k\Omega \pm 5\%$

❑ In the article 'Be(a)ware of the Smart Home' published in April issue, surveillance-as-a-service is mentioned as SaaS in text but SaaS is used for Software-as-a-Service. Here security using network based-IP is explained. VSaaS is the term commonly used for security using camera. VSaaS stands for Video Surveillance as a Service.

From Facebook: EFY's Electronics Design Community

When I was in the 10th standard, I used to buy EFY magazine regularly, read simple electronics projects and tried to construct those circuits; some of them worked! Then I thought of designing electronics projects by myself.

Finally, I designed a project and got first prize in the Electronics Design Contest conducted by EFY Group. Ramesh Chopra (editor and publisher of EFY Group) met us personally at EFY Expo 2014, New Delhi and appreciated our work.

Please accept our sincere thanks for your valuable time and attention that you have given to us. It was an opportunity to meet you at EFY Expo. Thank you very much again for your comments and inspiring us for the innovative technology.

We will introduce this technology to the Indian market very soon—with Manish Kavani, Nitin Jaiswal and Jay Savani.

Mahendra

published in July 2013 and November 2013 issues, respectively. The codes are available at source.efymag.com. Back issues of EFY may be purchased from Kits'n'Spares, New Delhi (website: www.kitsnspares.com).
