

Pico Projectors: Suit Yourself!

Gadgets are getting smaller by the day and pico projectors make a compelling argument. From the user's point of view, these devices make a lot of sense for corporate and business personnel. It is definitely a niche product for a niche market

PRASID BANERJEE

The inherent problem with writing buyers' guides is that, at the end of the day, the consumer buys what he or she likes. You do not go for what the 'expert' said and neither do you go for what the companies advertised. You buy something that fits your budget and suits your fancy. Fortunately though, this is exactly what works in your favour when buying pico projectors.

So, let us first talk about who buys pico projectors. To answer the question, we must dwell a little bit on what these little things actually are. In short, a pico projector is a handheld projector that can be connected to a mobile phone or a similar device to project documents, videos and images onto a larger screen. That quite sums up who would need and buy these devices.

You would buy them when you are in need of projectors often. This includes business professionals, students and gamers or movie buffs. A business professional would need it for his/her meetings, while students would probably use them in hostel

rooms for their presentations. Gamers or movie buffs, as the names suggest, would need it for playing games and watching movies.

At this point, you may be thinking what we meant by our original statement about buying anything that suits your fancy. Well, a pico projector is not something that many need. While a business professional may

have some real use for it, the number of students buying a pico projector for presentations is limited, if any, especially considering the fact that most projects have their own full-fledged projectors.

So, you will basically be buying something that catches your fancy and suits your purposes. But still, there are some points that you should look at.

PICO PROJECTORS TO CHOOSE FROM

Acer C120	Portronics POR 315 Pico Projector	Acer K135	Portronics iLume Pico Projector (POR 340)	Acer K335
