

Battery

It is a portable device and it runs on battery. So, just like you do while buying a smartphone, you need to ensure that your projector has good battery life. In general, pico projectors' batteries last for less than two hours. Basically, you are looking for something that can get you past 90 minutes, which would work for most. For a business user, you do not show a presentation that is longer than that. For students and movie lovers, it is enough time to watch presentations, movies and videos.

Portability

Okay, all pico projectors are portable, so the choice really is about how portable they are. This includes factors such as shape, size and weight of the device. A pico projector can weigh as much as 250-300 gm, which would make it somewhat difficult to carry around if you have to do so often. So if you are going to use it often then something nearer to 100gm would make more sense.

The size and shape of the device defines how easy or difficult it is to hold it in your hand. They also come into play when you want to place it on any surface at different angles.

Connections

You are buying this device to connect it to your mobiles, laptops and cameras. While most pico projectors have connections for all these devices, it is good to ensure that they have HDMI slots, VGA slots and composite slots.

Brightness and resolution

The brightness and resolution of your projector will decide how good the picture quality is. The brightness and resolution, when combined with the distance at which a projector can project, brings out its true usefulness. This is an important aspect to consider when buying these devices.

Last but not the least

To conclude, while it is not impossible to buy a pico projector from brick and mortar stores, buying them online is better. This is because there are a number of offers and discounts that you get on websites such as Amazon, Jungle, Homeshop18 and the others. As mentioned before, these devices are not low-cost, so you can enjoy a wider number of devices when discounts are offered. ●
