

Robust, Wide Temperature Ethernet Remote I/O Solutions

- Built-in Ethernet switch ports for daisy-chain connections
- Ideal for distributed data acquisition systems

E1200 Series Features:

- Built-in 2-port Ethernet switch for daisy-chain topology
- User-definable Modbus/TCP addressing for painless upgrading of existing systems
- Peer-to-Peer cable replacement
- Push-based Active OPC Server™ for seamless connection to SCADA systems
- Wide temperature (-40 to 75°C) models are available

E1200 series Ethernet Remote I/O products come with two embedded Ethernet switch ports to enable a daisy-chain topology for easy cabling. Moxa's Active OPC Server™, with its "active" communication technology, enables ioLogik E1200 series products to be conveniently integrated with SCADA systems, and the user-definable Modbus address function allows for the easy upgrading of existing systems.

Available Models

Digital I/O Modules

ioLogik E1210 (16 DIs)
ioLogik E1211 (16 DOs)
ioLogik E1212 (6 DIs, 8 DOs)
ioLogik E1214 (6 DIs, 6 Relays)

Analog I/O Modules

ioLogik E1240 (8 AIs)
ioLogik E1241 (4 AOs)
ioLogik E1242 (4 AIs, 4 DIs, 4 DOs)

Temperature Modules

ioLogik E1260 (6 RTDs)
ioLogik E1262 (8 TCs)

Daisy-chain topology for Flexible Cabling and Space Reduction
