

Repair and Troubleshooting Tips

Fixing different electronic gadgets can become a challenge without proper know-how. Here are a few sites that will help you understand how to fix such devices

NIRAJ SAHAY

fixya.com

In 2005, too many product manufacturers were neglecting the post-purchase customer support. Frustrated by the lack of practical, post-purchase information, entrepreneur Yaniv Bensadon set out to build a community resource capable of providing relevant and up-to-date troubleshooting data. Today, FixYa continues to empower individuals to repair and improve upon their already purchased possessions. From fixing cars to cameras and iPhones, FixYans are part of a DIY revolution that helps empower techies, tinkers and hobbyists across the globe.

www.ifixit.com

ifixit.com

iFixit was started in 2003 by Luke and Kyle in a dorm room at Cal Poly, San Luis Obispo. This website provides free repair manuals and troubleshooting guides. It helps thousands of people repair their devices every day. Initially started for Apple products, it now provides step-by-step procedures, along with supporting pictures and videos, to fix problems related to any sort of electronic gadgets through its thriving community of experts and repair technicians.

fastrepairguide.com

This site provides repair and troubleshooting information for devices ranging from LCD monitors and computers to inverters and printers. Along with a comprehensive resource with a database of useful articles and repair guides, it also provides links to electronics projects and components' datasheets.

www.fastrepairguide.com

www.repairfaq.org/sam/tshoot.htm

repairfaq.org

The website is for those who are interested in troubleshooting and repair of consumer electronic equipments. It was updated on February 16, 2013, and the version 2.47a was released on the same day. It is owned and maintained by Samuel M. Goldwasser. This is a good resource for learning troubleshooting equipment.

fixingmycomputer.com

A free website, fixingmycomputer.com guides you on how to step-by-step troubleshoot your computer. The site also has multiple flowcharts to assist you. You can click on each such flowchart to get more information about any step.
