

BONDED HEATSINKS

- Pioneers of Bonded Fin technology in India
- Extremely high fin density and good Height to Width ratio provides very high thermal efficiency.
- Can be completely customized as per the need of customer. Choice of metal-aluminium and copper combination of both possible to match the exacting requirements of application

Applications:

- Most high power IGBT based applications like Solar Inverters, Industrial UPS, welding machinery, IGBT stacks
- Copper based heatsinks can be used for CPU's and other microcontroller chips
