

BINAY - Lighting Up The Future

BINAY LED-based HIGH, MEDIUM and LOW Intensity Aviation Obstruction Light Beacons

As per International Civil Aviation Organisation (ICAO) requirements Available in Low Intensity, Medium Intensity and High Intensity versions (as per International Civil Aviation Organization guidelines), BINAY's patented LED Aviation Lights come with 5-year/3-year warranties

LED Obstruction Lighting for:

- Industrial chimneys and smokestacks
- Transmission, microwave and cellular towers
- Radio, TV and similar structural towers
- High-rise buildings and structures
- Airports and airfields

THE BINAY LED Aviation Obstruction Light offers the following advantages:

- Fit-and-forget maintenance-free operation
- A long life of 100,000 hours (20 years at 12 hours daily burning)
- Pays for itself within a short period of operation in the form of reduced installation, maintenance and servicing costs
- Quick Installation; Reliable operation 365 days per year
- Shock-proof and vibration-resistant
- Over-Designed Intensity to allow for natural LED intensity degradation over its operating lifetime

THE BINAY LED OBSTRUCTION LIGHT IS UNDER ACCEPTED PATENT, AND AS SUCH IS A PROPRIETARY PRODUCT

POWERING LED TECHNOLOGIES WORLDWIDE SINCE 1983

a continuous image. Not only this, the company is also working on its modular smartphones, popularly known as 'Project Ara,' which would allow you to take apart and put back together the smartphone blocks.

A gaming mouse that puts every major action in the palm of your hand

Roccat Studios once again leads the way in gaming peripheral design and execution with the release of the highly touted and much anticipated Tyon All Action Gaming Mouse, arriving in the United States, Europe and Australia. The Tyon is a wholly unique gaming mouse that puts every major action in the palm of the player's hand.

The Tyon's X-Celerator, a two-way analogue stick, handles throttling, sprinting, rotating tank turrets and more with tried and tested ease of use. With 16 assignable buttons,

Tyon's X-Celerator gaming mouse

31 distinct possible functions and a near limitless level of customisation, thanks to Roccat's dedicated Easy-Shift[+] Button, the Tyon is a game-changer. Land, sea, air, space—mastery of each layer in the FPS gaming sphere is imperative for competitive gamers.

Its designers and developers have worked in close collaboration with gaming experts, logging hundreds of hours of testing and fine-tuning to ensure Tyon's abilities elevate play, meeting these challenges head-on. The Tyon's Dorsal Fin Switch, a two-click button set behind the mouse wheel, allows for a comfortable mid-finger action, eliminates the need for major hand adjustments, 576kB of onboard memory ensures vast storage of settings and macros, an 8200 DPI Pro-Aim laser sensor provides precision, quickness and accuracy, vivid RGBY two-part illumination for both the lower rim and wheel of the mouse gives the Tyon incredible range of personal style, and with a sleek black or white colour choice for the mouse itself, the Tyon truly is a marvel of form and function.

First wearable camera drone that captures your 'you' moment

Stanford post-doctoral researcher, Christoph Kohstall, has developed Nixie in order to capture a moment instantly just for yourself, without even thinking how to capture it. The electronics market, all over the world, is over-flooded with wearables these days. Now it is time for a wearable drone—Nixie.
