

Microcontroller Based Projects

Building microcontroller based projects has always been of great interest to engineers and hobbyists. This month we bring to you some websites that introduce you to microcontrollers and offer various project ideas

NIRAJ SAHAY

arduino.cc

This Arduino official site has a section where you can find a list of Arduino based project ideas. Arduino is an open source physical computing platform based on a simple microcontroller board. The list is helpful for both the novice and the experienced. The project ideas have been divided into three categories for easy navigation: Easy, Intermediate and Advanced.

chaokhun.kmitl.ac.th

This site offers schematic diagrams and software for hobbyists and electronic engineers to build microcontroller based projects at home. It includes projects related to AT89C2051/4051, 8051 family, AVR, PIC, Motorola and Intel x86. The site is a part of King Mongkut's Institute of Technology, Ladkrabang, Bangkok (Thailand). The site is copyrighted by Wichit Sirichote, who is an associate professor of applied physics in the department of applied physics of the institute.

electronicsforu.com

electronicsforu.com serves as a storehouse of information for the electronics and technology industry. The latest news, information about new products and a web search covering not less than 50,000 electronics websites are some of the facilities this portal offers. Not to forget the hugely popular EBY-tested DIY circuits and projects reproduced from Electronics For You magazine! There is a separate section for microcontroller based projects.

electrofriends.com

This is a one-stop educational site for the students of electronics and computer engineering. It has projects using microcontrollers and the other basic electronic components. The site also includes projects and tutorials for computer students. It also allows you to submit your own projects and articles related to electronics and computers. The site does not have any forum but has a community page at facebook.com.

best-microcontroller-projects.com

Here you will find microcontroller Tools Projects and Tutorials designed by John Main, a professional electronics design engineer based in the UK. Each project includes source code, description and schematics which you can use as a basis for starting your own projects or just use them stand-alone.
