

Your Partner in Automotive Wireless Testing

Wireless applications like eCall, car2car, driver assistance, cellular communications and wireless links have become ubiquitous in vehicles today.

Rohde & Schwarz supports manufacturers and suppliers with T&M solutions for developing and producing driver assistance and information systems, A/V components and wireless communications systems.

Your advantages:

- Worldwide development, sales and service network
- Unrivalled portfolio of T&M solutions for all wireless technologies
- Member of international standardization bodies
