

TABLE I
State-wise Solar RPO Targets

States	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
Andhra Pradesh	0.25%	0.25%	0.25%	0.25%	0.25%	0.25%					
Arunachal Pradesh	No regulation issued for RPO by the Power Department										
Assam	0.10%	0.15%	0.20%	0.25%							
Bihar	0.25%	0.25%	0.50%	0.75%	1.00%	1.25%	1.50%	1.75%	2.00%	2.50%	3.00%
Chhattisgarh	0.25%	0.50%									
Delhi	0.10%	0.15%	0.20%	0.25%	0.30%	0.35%					
JERC (Goa & UT)	0.30%	0.40%									
Gujarat	0.50%	1.00%									
Haryana	0.00%	0.05%	0.75%								
Himachal Pradesh	0.01%	0.25%	0.25%	0.25%	0.25%	0.25%	0.50%	0.75%	1.00%	2.00%	3.00%
Jammu and Kashmir	0.10%	0.25%									
Jharkhand	0.50%	1.00%									
Karnataka	0.25%										
Kerala	0.25%	0.25%	0.25%	0.25%	0.25%	0.25%	0.25%	0.25%	0.25%	0.25%	0.25%
Madhya Pradesh	0.40%	0.60%	0.80%	1.00%							
Maharashtra	0.25%	0.25%	0.50%	0.50%	0.50%						
Manipur	0.25%	0.25%									
Mizoram	0.25%	0.25%									
Meghalaya	0.30%	0.40%									
Nagaland	0.25%	0.25%									
Orissa	0.10%	0.15%	0.20%	0.25%	0.30%						
Punjab	0.03%	0.07%	0.13%	0.19%							
Rajasthan	0.50%	0.75%									
Sikkim	No regulation issued for RPO by the Power Department										
Tamil Nadu	0.05%										
Tripura	0.10%	0.10%									
Uttarakhand	0.03%	0.05%									
Uttar Pradesh	0.50%	1.00%									
West Bengal			0.25%	0.30%	0.40%	0.50%	0.60%

for solar power. And to do all this, it has surveyed many cities and sites across the country, and has assessed the suitability and potential of solar power in India.

Anurag Garg, vice president-solar business, Schneider Electric India says, "Government has been amending its policies and incentives from time to time to attract investment in this sector, which have been well accepted by developers and in some states response has been very encouraging. However, as we move forward, it appears much more needs to be done to

reach the NSM targets of solar power by 2017 and 2022. Government needs to look into barriers and processes causing delay after award of project to developers and help developers with policies which can speed up the implementation of projects (for example, acquisition of land or allotment of land in solar parks, financing by Indian banks, evacuation issues for large projects). Also, some minimum guidelines for tariff should be issued and state policies should have similarities to promote solar across the country. The states with less solar irradiation and

higher demand for power should have additional incentives. While there have been differential tariffs for developers with and without accelerated depreciation, tariffs could also be differentiated by size of project, as larger projects have advantages of economies of scale vs small-size projects, and can help promote distributed energy through small-size projects."

Challenges faced and resolution

In its developing phase, every industry has many challenges to overcome,
