

STM32 Nucleo boards

32-bit mixed signal MCU

Open development platform for flexible prototyping with any STM32

- Includes one STM32 microcontroller in 64-pin package
- Direct access to mbed online resources (mbed.org)
- Wide extension capabilities with specialized shields:
 - Arduino™ connectivity support
 - Access to all MCU pins through ST Morpho connectors
- On-board ST-LINK/V2-1 debugger/programmer
- Supported by IAR, Keil, and GCC-based IDEs (Atollic...).
