Touchscreen controllers

Cypress Semiconductor has introduced TMA140 TrueTouch controllers for low-cost mobile phones.

The TMA140 family delivers high-performance multi-touch capabilities on a feature phone budget. It offers excellent signal-to-noise ratio and Cypress's Exclusive Charger Armor feature for

screen sizes up to 12.7 cm (5 inches). The low-power family also offers better-than-0.5mm accuracy and gesture capability. It works flawlessly with Android, requiring no additional insulation layers or bridges. Customers can select from 36-pin and 48-pin QFN packages.

COMPUTING

Single-board computer

The Raspberry Pi Foundation has started accepting orders for its single-board computer developed in the UK. The computer is sold as Model A and Model B priced at \$25 and \$35, respectively.

The design is based on a Broadcom BCM2835 system-on-a-chip (SoC), which includes an ARM1176JZF-S 700MHz processor, VideoCore IV GPU and 256MB RAM. It does not include a built-in hard disk or solid-state drive,

and instead relies on an SD card. The board is powered by a 5V microUSB or GPIO header and consumes between 500 mA (2.5W) and 700 mA (3.5W) depending on the model.

The Raspberry Pi runs Linux kernel-based operating systems such as Debian GNU/Linux, Fedora and Arch Linux.

LIGHTING

Retrofit PowerLED tubelight

Binay Opto Electronics has introduced a retrofit PowerLED T-5 tubelight with all the drivers and electronics built inside the tube body. It has a slim profile

similar to the conventional T-5 fluorescent tubes. So it can be directly fitted into a standard T-5 tubelight strip.

The LED tubelight uses mid-power LEDs. Its total wattage, including the driver, is 15 watts. Further, the tubelight is protected against high voltages of up to 330V.

STORAGE

Credit-card-shaped USB flash drive

Moser Baer has launched a credit-card-shaped USB flash drive called Zap. The ultra-slim flash drive fits easily in wallets and card holders. The credit card shape lends credence and significance to the flash drive, making users little more cautious in using and keeping it safely.

Zap has a storage capacity of 4 GB, measures 8.4x5.3 sq.cm and weighs just 10.2 gm. It has a USB 2.0 interface, and is compatible with Windows 2000/XP/ME/Vista/7, Mac OS 9.0 and later versions, and Linux Kernel 2.4.0 and higher versions. Rugged design makes it suitable for Indian operating conditions.

SOFTWARE

MATLAB and Simulink Release 2012a

MathWorks has announced Release 2012a of its MATLAB and Simulink product families. New to this release are HDL Coder and HDL Verifier.

R2012a highlights for MATLAB include unified functions for 1D, 2D and 3D numerical integration and improved performance of basic math and interpolation functions, MATLAB Compiler Runtime (MCR) available for download, simplifying distribution of compiled applications and components, automatic image registration using intensity metric optimisation, and enhanced interface.

R2012a highlights for Simulink include the ability to run models directly from Simulink on target hardware, AUTOSAR 4.0 compatibility, reduced data copies and linking of code generation reports with Simulink Web views, second-generation multibody modeling and simulation with new 3-D visualisation, and real-time execution of models in Windows.
