

Solar Energy

Renewable energy is making a noticeable impact on mankind. The sun is a massive store-house of energy. Solar panels are the way to use solar energy in our daily life. Here are a few websites which can enlighten you on the topic

Solar Server

This site gives you almost everything you wanted to know about solar energy. It lists out solar related companies, research organisations and educational institutes. The site also has sections for solar energy related jobs and events. It is viewed by roughly 16,000 users a day. It claims a monthly average of 210,000 hits and more than 1.5 million page views.

DiscoverCircuits

This site is a one-stop resource for engineers, hobbyists, inventors and consultants alike. It is a collection of information and offers quick solutions to electronic design problems. The site was launched in year 2002 and currently has 30,000+ electronic circuits or schematics carefully cross-referenced into 500+ categories. The site is owned by David A. Johnson, PE, who is an electronics engineer with over 30 years of practical experience in the areas of analogue and digital design, fibre-optics and RFID. It has a list of websites where you can find different circuits and projects using solar energy.

Source Guides

This site is a comprehensive buyers' guide and business directory to more than 18,000 renewable energy businesses and organisations worldwide. The source guides have been providing comprehensive up-to-date information on renewable energy businesses worldwide since 1995. The site adds more than a hundred new renewable energy businesses each month. It has features to locate renewable energy businesses by geographic location, product type, business type and name. You can also search for renewable energy businesses using keywords. The site also has a news section on the latest in renewable energy.
