

lated that the tablet will have access to Google Play.

The first wave of 100,000 tablets will be provided to students from higher technical educational institutions.

Fujifilm forays into interchangeable-lens camera segment

Fujifilm India has launched 16 new cameras across various segments, with models priced from Rs 4999 onwards.

Fujifilm interchangeable-lens camera X-PRO1

The company has also launched an interchangeable-lens camera X-PRO1, which is priced at Rs 100,000. Entering a market segment which is dominated by Nikon with a 55 per cent market share and Canon covering almost the rest with 40 per cent, Fujifilm is not looking at becoming their competitor — at least for the time being.

"Initially, we will be looking at positioning the camera as a second camera for professional photographers. Once they experience it, they will realise the difference and opt for it as a primary camera too," said Sriwant Wariz, national marketing manager, Fujifilm India.

Fujifilm is looking at a 15 per cent market share in the next three years.

Samsung to double tablet sales in India

Samsung Electronics plans to increase its tablet sales in India by two-fold this year. The company has been steadily releasing a stream of tablets in India since 2010. It sold 300,000 tablets last year.

To meet customers' requirements, Samsung is working on innovative up-

coming technologies such as AllShare that will take support from the cloud, if needed.

The company is also aggressively pushing its flat-panel TV business in India—a segment which is expected to touch five million units this year. Samsung India Electronics currently has around 30 per cent market share of 3.8 million flat-panel TVs in the country. The flat-panel segment consists of LEDs, LCDs and plasma TVs. In India, Samsung sells around 40 models of flat-panel TVs.

Acer to launch hybrid projector models

In keeping with the market requirement, Acer has strengthened its projector portfolio with products ranging from 50 lumens to 500 lumens, thus offering a complete range of LED projectors for customers across segments.

S. Rajendran, chief marketing officer, Acer India, said, "The projector market has witnessed maximum acceptance in the past few months especially from education, SMB and SOHO segments. 3D projectors have started gaining immense traction in the education segment. To address the growing consumer need, we will launch a range of hybrid models as well. The product range will hit the market in Q2 2012."

RComm to expand application-aware network service

Reliance Communications plans to expand its application-aware-network service, enabling businesses to upgrade to an intelligent network.

The network provides visibility and control of application performance across networks and increases wide-area network capacity by using cutting-edge traffic optimisation technologies. It improves business efficiency, as enterprises can improve employee productivity and get insights into their WAN and application performance at lower IT costs. The network has been
