Since this information is subject to change, all those interested are advised to ascertain the details from the organisers before making any commitment.

only lab in India to support repair and calibration of Kaye validation products, the company said.

With the opening of the new lab, GE has expanded its services capability to support calibration of validators, temperature baths, ice point reference pressure sensors, temperature loggers and intelligent RTDs with very high precision, meeting the critical requirements of the pharmaceutical and life science industries.

The GE lab is said to be the only one in India with the capability to calibrate temperatures to an accuracy of 0.005°C. It will also help reduce turnaround time for customers from three months to just one week.

NI establishes new electronic design specialty

National Instruments (NI) has announced the Electronic Design Specialty for NI Alliance Partner Network members with specialised skills in custom electronics.

The Electronic Design Specialty identifies trusted experts for customers looking to extend and customise NI reconfigurable input/output (RIO) hardware products (including CompactRIO, Single-Board RIO and FlexRIO), to meet their application needs. For specific customer applications that require specialised I/O or a unique form factor, these partners build RIO mezzanine cards for NI Single-Board RIO C Series modules using the CompactRIO module development kit and FlexRIO adaptor modules.

Xilinx expands R&D facility

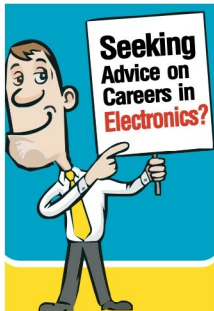

Xilinx, Inc. has inaugurated an expanded site in Hyderabad. The new office building is more than double the size of the previous site to accommodate engineering labs and collaboration space for end-to-end product development, a larger, energy-efficient data centre, and expanded facilities for customer and employee events.

The India site is the company's

Awards

Matrix Comsec bags Internet Telephony Award

Matrix Comsec has won the '2011 Internet Telephony Product of the Year Award' from *Internet Telephony* magazine for its SETU ATA211G—a SIP-based analogue terminal adaptor. The SETU ATA211G interfaces legacy telephone device with IP and GSM networks. It handles all the complexities of VoIP and GSM technology internally and provides simple telephone interfaces to make and receive calls.
