

Directory of Indian Electronics Industry 2012

This 25th edition is a useful resource for the Indian electronics and IT hardware sector. It provides the latest industry statistics related to electronics and IT production and exports, and policy framework including Draft National Electronics Policy and the National Manufacturing Policy. The directory lists out product suppliers alphabetically with their contact details and products. It also lists out key contacts, useful websites and ELCINA members.

Valuable data is provided from the ELCOMOS report—a nation-wide study on electronic component manufacturing and market for the entire electronics value chain.

The accompanying DVD contains all the data for quick reference.

Theory of Computation

This is an introductory textbook on the theory of computation, also known as formal languages and automata theory. Across twelve chapters, it contains 18 sections dedicated to bringing out key ideas of the subject. It also features tips and tricks for solving those problems for which no definite method exists, and debugging exercises. A separate appendix covers a set of 36 important theorems.

The book is useful not only for students but for anyone interested in understanding the science behind computing. The accompanying DVD contains example programs that can be run, a question bank and video lectures.
