

Take a Modular Approach to Wireless Connectivity

Wired and Wireless Connectivity Solutions

USB

Ethernet

ZigBee®

CAN

Easy to use • Low-cost solutions • Start designing today

Microchip's growing range of certified RF modules offer an easy way of adding wireless connectivity to embedded applications.

■ **Flexible Options**

- Sub-GHz ISM Band
- 2.4 GHz IEEE802.15.4
- 2.4 GHz IEEE802.11 - WiFi®

■ **Simplicity**

- Connection to PIC® MCU via 4 wire SPI
- Certified - FCC / IC / ETSI
- Software Stack - Free of charge download
- Comprehensive range of DevelopmentTools

■ **Applications**

- Security Systems
- Heating / Air Conditioning
- Entertainment
- Lighting

■ **Embedded WiFi**

- MRF24WB0MA & MRF24WB0MB
- Compatible with Microchip's 8/16/32 bit MCUs
- Low Power Consumption
- Low System overhead

■ **ZigBee® and MiWi™ -**

- MRF24J40MA & MRF24J40MB**
- Compatible with Microchip's 8/16/32 bit MCUs
- Common hardware platform supports ZigBee and Microchip's proprietary MiWi / MiWi P2P protocols

■ **Sub GHz Wireless Protocols**

- MRF89XAM8A module supports Microchip's MiWi Protocol offering P2P and Mesh Networking.

WIRELESS DEVELOPMENT TOOLS

Wireless PICtail™ development boards are built using the respective RF modules, example - Sub GHz PICtail (AC164138-1) uses MRF89XAM8A module.
