

Ultra-low-power EnergyLite™ Microcontrollers

STMicroelectronics

STM32L: The Ultimate in 32-Bit ultra-low power for uA budgets

Advanced security

Proprietary 130nm low-leakage technology

Touch Sense

Ultra-low power

STM32L152 / STM32L152 Low Power DemoBoard

STM32L

Cortex™
Intelligence Processors by ARM

Features:

- High-performance Cortex-M3 core @ 32 MHz
- 300 nA in Standby mode
- Dynamic voltage scaling
- Free touch-sensing library
- 32K to 384KByte Flash, upto 48K SRAM
- Rich set of high end analog and Digital Peripherals
- Compatible with STM32F family
- Find out more with the STM32L-Discovery kit

Applications:

- **Healthcare and Fitness**
 - Glucose Meters, Insulin Pumps, ECG, Sports Watches
- **Consumer**
 - Gaming, Barcode scanner, GPS
- **GP Portable devices**
- **Industrial**
 - Electricity/water meters, Home Automation
