Duratool 9 Electronic Toolkit

Part: ZD-901
Availability: element14.com
Price: ₹ 1531.30

This toolkit is aimed at general-purpose electronics tinkering rather than something as focused as telecom installation. It consists of a meagre 30W soldering iron, desoldering pump, solder, wrench, multiple pliers, digital multimeter and screwdrivers, and comes in a padded, zipper carry case. The padded case provides a convenient means for carrying and storing the tools. Soft cases tend to swing a lot, and you won't want the case swinging onto your knee with the wrench as the point-of-contact. This kit is recommended for all electronics project amateurs as it contains everything they need to get started. However, for professional-quality, you might want to check out the PROSKIT model.
