Inde Electronics Maintenance & Field Repair Deluxe Kit

This is the grand daddy of all tool kits. Coming in a lockable aluminium hard case, it has almost every foreseeable tool that an electronics engineer would use. What sets this tool kit apart from the rest is the increasing use of separation between different sub-kits. You have a dedicated box for your drill components, a storage box for your electronic components, a platform for the whole screwdriver set including precision screwdrivers, and a full soldering package. The kit also has 'luxury' stuff like a solder-iron stand with sponge, mini vacuum cleaner, holding vise, IC extractor, fuse puller and telescopic pickup tool. It's a true all-in-one package dedicated to make your electronics tinkering easier.
