free to use and distributed under the GNU General Public License.

SharpDevelop

SharpDevelop includes features very similar to those found in Visual Studio. It is written entirely in C# and consists of many small components that integrate to form the application. The IDE includes tools for integrated debugging (including dynamic debugging features), code analysis (FxCop) and unit testing (NUnit). It works on MS Windows and is released under LGPL.

Code::Blocks IDE

Code::Blocks is an Open Source cross-platform IDE for C/C++. Most of its features are provided by external modules (plugins), making it easily extendable and configurable. As plugins are used, any kind of functionality can be added by installing/coding a plugin. For instance, compiling and debugging functionality is already provided by plugins!

Code::Blocks supports multiple compilers, including MinGW/GCC, Digital Mars, Microsoft Visual C++, Borland C++, Watcom, LCC and Intel C++. It runs on Windows, Linux and Mac OS X and is distributed under GPLv3.

CodeLite IDE

CodeLite is an Open Source, cross-platform IDE for C/C++ programming languages. It works on Windows, Linux and

Mac OSX. CodeLite is distributed under the GNU General Public License v2 or higher version.

Bluefish

Bluefish is a powerful editor for experienced Web designers and programmers. It supports many programming and markup languages, but focuses on editing dynamic and interactive websites. It is a multi-platform application that runs on most desktop operating systems including Linux, FreeBSD, MacOS-X, Windows, OpenBSD and Solaris. Bluefish is released under the GNU GPL.

Aptana Studio

Aptana Studio is a powerful Open Source Web development IDE. It is used for building Ajax-based Web applications. It's now much faster and customisable and includes new features to help you become more productive. Aptana Studio provides support for developing PHP applications via the add-on PHP plugin. It also supports Ruby on Rails and Python. It is a cross-platform application and works on Linux and Windows. It is released under Dual License, Aptana Public License v1.0 and GNU General Public License. ●
