

Where you see Light, We see Opportunity

SemiLEDs Corporation has asserted itself as a groundbreaker in the LED industry as the developer and manufacturer of the 'MvpLED' products. With our proprietary and patented technology, the MvpLED outshines the competition because of two unique advantages:

1. Copper Alloy Base- giving the highest thermal conductivity of 400 W/m-k.
2. Vertical Structure- providing a perfect lambertian light emission pattern.

SemiLEDs offer a wide range of ultra-high power **LED chips and components** for lighting applications and has enjoyed notable success in the UV LED market.

SemiLEDs is a publicly traded company on the NASDAQ Global Select Market (ticker symbol: LEDS) after successfully completing an IPO in December 2010.
