

BOURNS®

www.bourns.com

Bourns has a long history of serving the automotive market with quality sensor products, and the company's inductive and circuit protection components are available to meet the non-sensor, board level requirements of multiple automotive applications.

With excellent customer service and the availability of field application engineers, Bourns works closely with automotive system designers in selecting the right components, providing layout support, and making modifications as necessary.

Bourns performs surge tests and offers application and customer-specific testing. Leaving the details of circuit protection and inductive technology to Bourns allows automotive designers to concentrate on their specific core application differentiation.

Driver Assistance

Key products:
MF-SM Series/MF-D Series
