3D Blu-ray Home Theatre System

Enjoy high-quality surround sound from Sony's BDV-N990W that features magnetic fluid speakers

Sony India has launched a new 3D Blu-ray home theatre system, the BDV-N990W. The system comes equipped with Sony's S-Master full digital amplifier featuring its 3D surround technology.

The 5.1-channel audio system includes energy-efficient magnetic fluid speakers that use ferrofluid (ferromagnetic fluid) for distortion-free sound. The setup comes with four floor-standing speakers that deliver a total output of 1000W RMS.

The home theatre system includes built-in Wi-Fi connectivity, two HDMI ports, a front and a rear USB port, and is DLNA-certified, allowing content transfer from

compatible devices. With media remote and remote keyboard application, Sony tablet or smart-phone can be used to adjust the settings or used as a keyboard for typing. Users can also dock their compatible iPhone or iPod and charge it via USB while listening to playback music.
