

Dual-Pairing Bluetooth Headset

Envent's Breeze+ allows you to connect with up to two devices at a time

Envent Worldwide has launched a new Bluetooth headset called Breeze+. The headset features dual pairing, which allows the users to connect with two devices at one time. iPhone users can view the battery meter of the device on their screen.

The headset has an auto-off feature which switches off the Bluetooth if not connected for up to 10 minutes. It gives a talk-time of six hours and standby time of 140 hours. The rechargeable Li-ion battery takes up to two hours to charge.

With an operating range of 10 metres, this Bluetooth headset is compatible with most of the mobile phones. Featuring the latest Bluetooth version 3.0, it gives a crystal-clear transmission.

14MP Camera With 30x Optical Zoom

Fujifilm's SL300 offers a fast startup time of just 1.8 seconds as well as improved auto-focus speed

Fujifilm has launched the FinePix SL300, which features a powerful 30x optical zoom lens at a comparatively affordable price. It includes a 14-megapixel CCD sensor with a large 7.6cm (3.0-inch) screen as well as an electronic viewfinder to help conserve battery power.

The SL300 is capable of shooting 720p video. Its super macro mode allows you to shoot objects as close as 2 cm away. The 24mm wide-angle lens allows shooting of panoramic photographs. The camera supports light sensitivity up to ISO 6400, which helps in low-light conditions.

The SL300 offers a fast startup (in just 1.8 seconds) as well as fast auto-focus. So you don't miss out on an important photo opportunity.

The camera claims that the camera's internal flash and a hot-shoe for connecting with a separate external flash make it suitable for professional shoots too.

Portable Universal Charger

Portronics' Charge X can charge all of your devices that charge using USB

Portronics has announced a portable device charger that can charge two devices at a time as it features two USB ports. The charger, called Charge X, comes with a 5600mAh Lithium-ion polymer battery and can charge mobile phones, tablets, gaming consoles, Bluetooth receivers, portable speakers and GPS devices.

Weighing 136 gm, the device comes with multiple adaptor extensions, including microUSB and Apple-specific connectors. An LED displays the available battery charge, which the device can sustain for over a year if left unused.

The battery pack requires 11 hours to charge via microUSB at 5V\1A max, and offers around 125 minutes

of charging time at output levels of 5V\1A. The charger is claimed to provide more than 24 additional hours of calling, an additional 120 hours of music, and 30 more hours of Wi-Fi or video on a single charge.
