

SEMICONDUCTOR MANUFACTURING: A susceptor of graphite is heated through induction. The model shows the temperature distribution inside the susceptor and on the quartz tube.

Verify and optimize your designs with COMSOL Multiphysics®

Multiphysics tools let you build simulations that accurately replicate the important characteristics of your designs. The key is the ability to include all physical effects that exist in the real world. Order a free CD containing 700 multiphysics presentations at www.comsol.com/confcd
