

Canon inkjet printer

its PIXMA range of inkjet printers along with new ink efficient series and colour-variant models. With the introduction of new applications for its inkjet printers, innovative product range and state-of-the-art production facilities, the company aims to become No. 1 in inkjet printer category in India by 2015.

Dr Alok Bharadwaj, senior vice president, Canon India, said, "Canon had phenomenal growth by 30 per cent in inkjet category year to date. This print space is undergoing major reconfiguration following our introduction of new technology that makes print cost more affordable. With strong marketing initiatives, our market share has jumped to 22 per cent in Q3 2012. This domain is vital for our future plans and we are aiming to reach 25 per cent in the year 2013."

TCS to set up software development campus in Indore

Tata Consultancy Services (TCS) will set up operations in Madhya Pradesh by building a new integrated campus in Indore for IT and BPO with an ini-

tial investment of Rs 5.5 billion in the first phase. Once all the applicable permissions are received, the construction of Phase I is expected to complete by March 2016. The Indore campus will be located on a 100-acre land allotted by the Madhya Pradesh government. On completion, it will provide direct job opportunities to 10,000 associates in Phase I. Besides direct job opportunities, there is an estimated indirect job opportunity for another 10,000 people in supporting functions and professions like e-waste management, facilities management, transportation, hotel and hospitality, restaurants, utilities and financial, banking and other services.

GE to hire 500 R&D engineers in India

General Electric (GE) is looking to invest \$60 million in its Bengaluru technology centre over the next three years. The company is also looking to increase the centre's headcount to 5000 by the end of this financial year. Currently, the centre has over 4500 employees engaged in R&D in areas like energy, healthcare and aviation.

Gopichand Katragadda, MD, India technology centre, GE, said, "Our new hiring would focus on senior-level positions to further deepen the technological strength of the centre. We have what we call chief engineers, who are people who finally clear designs of products, and principal engineers who support the chief engineers. We

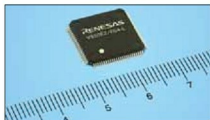

will increase the numbers of these engineers."

Digi-Key to sell Touchstone ICs

Global electronic components distributor Digi-Key Corporation will now distribute all of Touchstone Semiconductor's analogue IC products. Touchstone's product offering available through Digi-Key will include operational amplifiers, comparators, current-sense amplifiers, timer ICs, voltage detectors and voltage references.

Renesas unveils next-generation product roadmap

Renesas Electronics has disclosed details of its roadmap for next-generation microcontrollers and microprocessors. The company plans to use its 40nm MONOS (metal-oxide nitride-oxide silicon) embedded flash technology with

An MCU by Renesas Electronics

its RX family of high-performance, general-purpose 32-bit microcontrollers. It is also expanding the RX family to include the lowest-power, lowest-cost 32-bit microcontrollers for the embedded market, integrating as little as 8 kB of flash memory.

Renesas also plans to introduce a family of ARM-based high-performance embedded microprocessors. The new RZ family will be used in a wide range of applications that require high-speed data processing in excess of 300 MHz.
