

Turn-key Solution for RF and Communication Experiment Courses

Date: Feb. 21 ~ 23, 2013 Booth No.: E29/Hall 7
Venue: EFY Expo, New Delhi, India
Website: <http://www.efyexpo.com/>

Price Starts From Rs79,000 for Education

GSP-730 & GRF-1300 3GHz Spectrum Analyzer & Communication Trainer

GSP-730 spectrum analyzer is developed to meet the needs of educational users. The 3GHz frequency range, high resolution TFT LCD, USB interface and VGA output satisfy the demands required in today communication course. GRF-1300 is a Communication System Training kit which consists of base band and RF signal generators. GRF-1300 provides the experiments including harmonic of sine, triangle and square waveform, AM/FM for communication system and signal experiment.

This turn-key solution includes GSP-730 spectrum analyzer, GRF-1300 training kit, remote control software and experiment book. In order to provide more convenience for lecturer, all of the training material has been transferred to PowerPoint files. Furthermore, lecturer can use the remote control software to control GSP-730 / GRF-1300 parameter and show the test result in the classroom. A total electronic educational environment which is not seen before can be established now.

FEATURES

- Frequency Range : 150kHz ~ 3GHz
- Autoset Function
- Noise level : -100dBm
- RBW Range : 30kHz, 100kHz, 300kHz, 1MHz
- ACPW/CHPW/OCBW Measurement
- 3 Traces in Different Colors
- Split Window Function
- Limit Line Function
- Remote Control Software
- Presentation Material for Training Courses
- Support Interface : USB Device/Host, RS-232C
- 5.6" TFT LCD with VGA Output

GRF-1300 Communication Trainer

- Base Band Signal : Sine, Triangle & Square Waveform
- Base Band Frequency Range : 100k ~ 3MHz
- RF Signal Frequency Range : 870 ~ 920MHz
- Analog Modulation : FM / AM

Curriculum Contents

- Frequency Domain and Time Domain.
- Spectrum Analyzer Basics.
- 9 Experiments Include Signal and Harmonic, AM/FM Measurements.
