

Only scope

with a built-in spectrum analyzer.

- 1 Time Domain Display
- 2 Frequency Domain Display

The world's first mixed domain oscilloscope is now even more accessible.

The award-winning Tektronix MDO4000 Series Mixed Domain Oscilloscope is turning heads with its revolutionary built-in spectrum analyzer. For the first time, you can capture up to 21 time-correlated analog, digital and RF signals with one instrument. You can even view the RF spectrum at different points in time to see critical changes. Now the year's top scope is even more impressive. Which means you can capture more signal types with one instrument than ever before. For less than ever before.

MDO4000 Mixed Domain Oscilloscope

- 4 analog channels
 - 100 MHz to 1 GHz bandwidth models
- 16 digital channels
- Parallel and serial bus triggering and analysis
- Built on the MSO4000B mixed signal oscilloscope platform
- 1 RF channel
 - 50 kHz – 3 GHz and 50 kHz – 6 GHz frequency range models
 - Ultra-wide capture bandwidth up to 3 GHz
- Unique RF analysis tools: automated markers, spectrogram display, RF vs. time traces, advanced RF triggers

● Find the right scope for your project and budget at scoperevolution.com.
