

Hercules™ safety devices help you create robust, safe industrial applications

Hercules RM features:

- Ideal for industrial and safety critical applications
- Integrated Motor Control peripherals including 12-bit ADC
- On-chip Ethernet, CAN and USB connectivity
- Flexible Timer Coprocessor
- Safety features in hardware

Hercules TMS570 features:

- Ideal for transportation and automotive safe motor control applications
- Performance options range from 80 MHz to 180 MHz; memory options from 256KB to 3MB of Flash
- Flexible Timers and 12bit ADC for motor control

A variety of tools, software, training material, and documentation is available to make your design process easier. Visit www.ti.com/hercules

All Hercules devices are part of the **new SafeTI™ design packages** to ease certification and simplify designs for safety-critical applications.
