

Choose the right protection... and get maximum performance

Clean, Protect, Lubricate

Electrolube products are specified and widely used throughout many markets and for an array of applications, **LED's being just one speciality!**

Highly Thermally Conductive RTV

TCOR and **TCER** are high thermal conductivity, solvent free RTV silicone bonding compounds, providing excellent electrical insulation and chemical resistance.

Both are moisture cured. **TCOR** is ideal for spot application while **TCER** is easier to spread over a contact area.

Thermal Paste

HTSP Silicone heat transfer compound plus. Superior thermal conductivity even at high temperatures 3.0 W/m.K. It has excellent non-creep characteristics and wide operating temperature range: -50 to +200°C.

High Performance Acrylic

HPA, is a flexible, fast drying transparent, non-yellowing acrylic conformal coating approved for the protection of LED components and electronic circuitry.

Clear Silicone Resin

SC3001 is an optically clear Silicone two part potting compound ideal for use wherever high clarity is required. **SC3001** can encapsulate LEDs with minimum light loss but a high level of environmental protection. Its low viscosity allows very easy application even in thin films.

Clear Polyurethane

UR5562 is a semi-rigid optically clear high performance resin ideal for use in LED and protective applications.
