Apple iTV coming by 2013-end

Apple is planning to launch a television, dubbed iTV, by the end of next year. The TV is expected to retail for \$1500 to \$2000. It is expected to be available in screen sizes of 107 cm (42 inches) and 140 cm (55 inches).

Opera Mini 7.1 for J2ME, BlackBerry devices

Opera has released a new version of Opera Mini for Java and BlackBerry devices. The Opera Mini 7.1 browser offers a revamped download manager that lets users easily handle the downloaded media such as documents and multimedia.

Opera states, "Many mobile users know that Internet connections can be fickle at times. Sometimes it may feel like the universe is trying to tell you something when the 10MB presentation from your boss stops downloading at 9.99 MB after your train enters a tunnel and the mobile signal is lost for a few seconds."

Titanium Maximum Security 6.0 launched

Trend Micro has released Titanium Maximum Security 6.0. The software is said to ensure maximum security for online activities. It provides users with a friendly interface, simple screens and clear reports. It features 5GB online storage, mobile device protection for tablets and smartphones, secure document vault, password management and parental control.

Nokia Drive is now Nokia Here

Finnish company Nokia has rebranded its Nokia Drive mapping service to Nokia Here and also introduced new features such as collections, 3D maps and a maps editor.

'Collections' lets you save searched locations to your Nokia account. This allows you to quickly access the saved locations instead of having to search for them again. '3D maps' lets you get a 3D view of key locations around the world. Comparisons can be drawn with Apple's own 3D maps service called Flyover. The maps editor lets users update street names and traffic information. The information will then be available to other users of the mapping service.

Smart LED TV

The Samsung ES9000 offers a faster Smart TV experience through a new dual-core processor that allows consumers to download and use multiple apps while browsing the Web

Samsung Electronics has come up with a 190.5cm (75-inch) 75ES9000 LED Smart TV in the Indian market. The ES9000 has a stunning design, with a rose-gold-coloured finish and a super-slim 7.9mm curved bezel without visible seams. Additionally, the TV's built-in camera is hidden within the top of the bezel, rendering it invisible when not in use.

Users can control and interact with their TV in a more intuitive way, choose from a broader range of premium and signature content that can be shared across multiple de-

vices, and access the latest hardware and software features to constantly receive updates on their TV.

The ES9000 also includes Sound Share, which automatically and wirelessly connects TV audio to Samsung's Series 6 and Series 7 wireless audio with dock systems.

Mega Sub-Woofer System

Mercury MW series combines superb bass performance with the convenience of inputs, enhancing the music experience for users

Kobian has launched a new series of 2.1-channel sub-woofers, including models MW4240, MW4540 and MW4840. The wooden sub-woofers have been designed to reduce the distortion and increase the quality of music.

The wooden subwoofer power is a true 10W RMS and each of the shielded satellites delivers 5W RMS. Access to controls along with SD card and USB is provided on the front, allowing ease of use. The sleek black-and-red

tweeter adds details to high-end frequencies, while acoustic guitars and pianos gain warmth and character due to full-spectrum audio from two-way design speaker.

Price: ₹ 1999
