¹The CPU score was calculated from the mean BrowserMark scores (on the stock browser) and scaled to a maximum of 10 with the best CPU (Tegra 3) scoring 10. All other scores are relative to it.

²The GPU score was calculated from the mean GLBenchMark frames per second and scaled to a maximum of 10 with the best GPU (SGX543MP2) scoring 10. All other scores are relative to it.
